

Product Guide

Health & Wellness Centres

Projects Powered by Waterlink Equipment

Our equipment is trusted by leading builders and aquatic specialists across Australia. While we are not responsible for the construction or installation of these facilities, our advanced water quality systems and automation solutions are integral to their performance.

These projects showcase how Waterlink products are used to deliver reliable, efficient, and scalable outcomes in all sizes aquatic environments, supporting everything from public pools to aquatic centres and swim schools.

Explore the projects that rely on Waterlink technology to maintain exceptional water quality and operational consistency.

Queensland Cowboys Stadium

Function Well Gym

Sydney Rooster Centre of Excellence

Xtra Clubs Bondi Junction

Onsite Chlorine Generation

Envirogen Series Salt or Magnesium

The Envirogen units combine a chlorine generator with an advanced control system. Choose from options with chlorine only control, pH control, or both. With 4 programmable GPOs and 4 relays, they handle tasks like CO2 dosing and heating control. Automation can be sensor-based or timer-based.

Envirogen
Standard Salinity 3000ppm

Envirogen
Low Salinity 1750ppm

 **Upgrade Options:** Probe Kits, Dosing Pumps, Remote Monitoring

Primary Sanitation

Our advanced dosing systems deliver optimal water quality across a variety of aquatic environments.

Hydro Touch Domestic & Light Commercial Chemical Dosing System

Hydro Touch pH & ORP controllers provide the ultimate solution for high-performance precision dosing, ideal for both residential and commercial use with pools & spas up to 160,000 litres.

Tere'O Touch Chemical Dosing System

Tere'O Touch is an automated chemical control system for domestic and commercial pools and spas. It provides options for monitoring free or active chlorine, pH, and more, with touchscreen operation and remote monitoring available. It is suitable for indoor and outdoor pool and spa applications that require reliable chemical dosing control.

 **Upgrade Options:** Remote Monitoring, Temperature & Dosing Pumps

Odi Touch Chemical Dosing System

ODI Touch is an automated chemical control system for domestic and commercial pools and spas. It provides options for monitoring free or active chlorine, pH, and temperature, and can also measure total chlorine, conductivity, and more. With touchscreen operation and remote monitoring available, it is suitable for indoor and outdoor pool and spa applications that require reliable chemical dosing control.

Secondary Disinfection

Synergy Series

Our Synergy series combines Advanced Oxidation Processes (AOP) with ozone and UV technologies to effectively neutralize pathogens like Cryptosporidium, E. coli, and Giardia, while significantly reducing chloramine levels and unpleasant pool odours.

Upgrade Options: Available Upon Request

Synergy Econ Low-pressure AOP

Synergy Econ combines ozone generation and low-pressure UV technology to deliver effective secondary disinfection and improved water quality.

Synergy Econ significantly reduces chloramines while targeting harmful microorganisms such as Giardia and Cryptosporidium, supporting safer and more stable commercial pool operation.

Synergy MP Titanium Chamber & Medium-pressure AOP System

Synergy MP combines ozone generation with a titanium medium-pressure UV reactor to deliver high-performance secondary disinfection.

Built in Australia, this advanced system delivers powerful oxidation and superior water treatment for commercial aquatic environments.

Synergy Plunge Compact Footprint AOP System

The Synergy Plunge is a compact, flexible AOP system designed to deliver effective secondary water treatment where space and installation flexibility are essential. Its innovative design allows for both vertical and horizontal installation, with flexible inlet and outlet connections that simplify integration into new and existing plant rooms.

Advanced Water Treatment and Automation for Facilities of All Sizes

Waterlink empowers the aquatic industry with dependable, easy-to-use equipment that improves water quality, operational consistency and long-term performance.

With a focus on quality, automation and durability, we support our partners in building better systems by supplying trusted components that perform reliably, day after day.

Our products form the foundation of efficient, scalable aquatic systems, designed to integrate seamlessly across a broad range of facilities and operating environments. Whether for a new installation or an upgrade to an existing

site, our range includes solutions tailored to meet the needs of your facility.

Backed by decades of industry experience, we take pride in delivering quality through technical expertise, high-performance equipment and responsive service. Our systems are developed to meet Australian standards, with a focus on operational efficiency and sustainable water management.

Most importantly, it can remove human error from the plant room. Systems can be custom designed or adapted from our stock range.

Applications

Our product range is suitable for all Domestic & Commercial Aquatic Environments, including:

- ◆ Common Pools in buildings
- ◆ Retirement Villages
- ◆ Hotels
- ◆ Hospital Pools
- ◆ Learn to Swim
- ◆ Council Pools
- ◆ School Pools
- ◆ Aquatic Centres
- ◆ Government Facilities
- ◆ Gyms
- ◆ Wellness Centres

System Compatibility

Compatible with most commercial pool systems. Integration support available via Waterlink's technical team.

Warranty

Waterlink systems are built for durability. This product is backed by our standard commercial warranty. For full warranty terms and coverage, please visit www.waterlink.com/warranty
